CITGO® Pacemaker® Gas Engine Oil 700 Series

OVERVIEW

- Medium ash oils formulated from high viscosity index base stocks and select additives to provide excellent wear protection and deposit control in high speed, severe-service engines.
- Contains zinc for a high level of antiwear performance. Additional antioxidant provides improved oxidation and nitration stability and resistance to thermal breakdown, needed for long service life.

FEATURES & BENEFITS

- Provide excellent valve face and seat lubrication.
- Improved engine cleanliness and sludge control performance in heavy-duty, high-temperature, and continuous operation.
- Improved resistance to oxidation and nitration.
- Better wear protection, especially in the valve train, and better protection from ring and valve sticking.
- Higher TBN offers longer oil life through greater protection against acid increase and corrosive wear.

APPLICATIONS

- Recommended for naturally-aspirated to turbocharged, medium- and high-speed, high-output four-cycle engines in field gathering service.
- Recommended for engines in cogeneration service, digester gas-fueled, dual-fueled (i.e. diesel/natural gas), and diesel-fueled service.
- For use in lean/clean burn engines; NOT recommended for engines equipped with catalytic converters.
- Can also be used to lubricate the compressor cylinders in natural gas service.
